Front & Rear Loader Compaction Containers

These Compaction Containers are engineered for seamless integration with AutoPak® and IDC Compactors. Highly durable, the containers are constructed entirely of 11-gauge steel across the bottoms, sides, and lids. Standard units are finished in green and equipped with a lid hold-down bar or lid locks, as well as four 6-inch heavy-duty phenolic resin casters (two fixed and two swivel) for reliable mobility.

Options and Specifications

11-gauge steel construction, 6-inch heavy-duty phenolic resin casters, a hold down bar or lid locks, 3/16-inch steel front-load fork pockets, 1-1/2-inch cold-rolled steel rear-load trunnion bar.

*Additional options/customizations available upon request
